## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of group II, ethylene glycol and N-vinylpyrrolidone in the reply filed on 2/27/08 is acknowledged. The traversal is on the ground(s) that there is no burden on the examiner evidenced by the first action on the merits mailed 7/5/07. This is not found persuasive because the claims are patentably distinct for the reasons of record. Applicants' attention is directed to 37 CFR 1.142. Here it is stated that the requirement will normally be made before any action on the merits; "however, it may be made at any time before final action." As such, the fact that the requirement was not made prior to first action on the merits does not support applicants' opinion as to the burden upon the examiner. Assuming groups I and II are related as product and process of use, as alleged by applicant, restriction remains proper. The product as claimed can be used in a materially different process such as in adhering films as shown in US 5,219,906 issued to Shih et al. .

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 18-21, 25-27, 31, 32, 35, 44 and 45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1796

4. All claims are indefinite because it is unclear as to how a "noncyclic lactam" falls within the scope of the lactam claimed. By definition a lactam is a cyclic compound. It is unclear as to how noncyclic compounds are lactams. Clarification is required.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 18-21,25-27,31,32,35,44 and 45 rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,219,906 to Shih et al.

7. This patent shows lactam polymers that can be polymerized with acrylate monomers that can fall within the scope of those claimed, see column 2 lines 22-24. The use of the ethylene glycol as a solvent is suggested at column 1 line 64. The difference between the art and the claimed invention is that the acrylate is not exemplified and is an optional monomer. Further, the examples use ethanol as a solvent. The claims are obvious given the butyl acrylate and ethyl hexyl acrylate monomers are suggested and the ethylene glycol solvent is an alternative to the ethanol.
